

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 to 9 (cancelled)

10. (original) A method for cutting and folding printed products comprising the steps of:

- driving with a first motor a first loop for cutting a signature and transferring the signature to a first gripper with a first motor;
- driving with a second motor a second loop for tucking the signature into a first jaw and transferring the signature to a second gripper; and
- driving with a third motor a third loop for tucking the signature into a second jaw.

11. (original) The method as recited in claim 10 further including altering a phase between at least the first and second loops, so as to set a lap or perform mode change.

12. (original) The method as recited in claim 10 further including using a phasing center to alter a phase between a tucker in the second loop and the first jaw so as to perform a group jaw adjust.

13. (original) The method as recited in claim 10 further including using a phasing center to alter a phase between a tucker and a second jaw in the third loop so as to perform a group jaw adjust.

14. (original) A folder comprising:

- a first cylinder having a first functional device and a second functional device;
- a second cylinder having a third functional device dependent on the second functional device;
- a first motor driving the first functional device; and
- a second independent motor driving the second and third functional devices.
